Questions relatives à la fin de vie

1

LES DATES DE FIN DE VIE, DITES END OF LIFE (EOL) SONT DIFFICILEMENT IDENTIFIABLES ET LA COMMUNICATION PEUT PARFOIS MANQUER DE TRANSPARENCE.

Il peut être perturbant de chercher les dates de fin de vie de vos équipements hardwares de Datacenter. Légalement, les constructeurs doivent publier ces informations dès qu'elles ont été officialisées.

Bien que les constructeurs doivent poster ces annonces, ils n'ont pas l'obligation de vous alerter.

Il est de votre responsabilité et celle de votre département IT de rester informé et de vérifier régulièrement, sur les sites des constructeurs, ces dates de fin de vie et de fin de service.

Quand vous avez connaissance de cette information vous devriez anticiper les futurs changements de votre stratégie d'achat et de support de maintenance. Une fois un équipement End of Life (EOL), il sera quelques mois ou années plus tard déclaré comme End of Service Life (EOSL).

Une fois l'annonce de la date de fin de vie annoncée, vous ne serez plus en mesure d'acheter les pièces détachées et/ou configurations chez le constructeur. Votre garantie constructeur arrivera très probablement bientôt à échéance et si vous souhaitez demander l'extension du support, son prix augmentera de manière significative

2

EOSL VEUT DIRE FIN DU CYCLE DE VIE DU CONSTRUCTEUR... MAIS IL EXISTE DES ALTERNATIVES !

Quand les constructeurs révèlent les dates de fin de service, il ne vous reste que peu d'option en dehors d'avoir recours à des méthodes alternatives de support ou de remplacer votre équipement obsolète.

La tierce maintenance par un TPM vous permet d'assurer ce support de vos équipements serveurs, stockages, et réseaux et est une alternative aux garanties et extensions de garantie des constructeurs traditionnels.

Par exemple vous pouvez faire appel à un tiers mainteneur pour supporter vos équipements IBM, HPE, DELL/EMC ou encore CISCO dans votre datacenter au lieu de souscrire aux services des constructeurs.

La stratégie du constructeur est de renouveler les équipements existants de ses clients tous les trois ans alors que la stratégie d'un tiers mainteneur est d'étendre le cycle de vie aussi longtemps que vous le souhaitez, après la garantie constructeur.

CONSTRUCTEUR

VS.

TIERS MAINTENEUR

COÛTS

Augmentation des coûts

Importante diminution des coûts

Privilégie la vente de nouvelles machines plutôt que renouveler les contrats de maintenance

L'objectif d'un tiers mainteneur est de fournir un service sur mesure répondant à vos attentes

L'important coût du service peut vous forcer à vous orienter vers un renouvellement de votre parc plus tôt que nécessaire

Bénéfice d'un bon fonctionnement de vos équipements datacenter même post-garantie, à un prix bien moins élevé

Frais de remise sous contrat : un client peut payer jusqu'à 12 mois avec effet rétroactif sur les équipements sous service

Pas de frais de remise sous contrat : le contrat devient effectif dès sa signature

COUVERTURE

Une marque – peu de flexibilité

Couverture multi-marques pour vos équipements datacenter

Les techniciens des constructeurs ne supportent que leur marque. Un datacenter disposant de différentes marques nécessite plusieurs techniciens

Les techniciens tiers mainteneurs disposent d'une expertise sur une variété de constructeur serveurs, stockages et réseaux et non une seule marque

Possible perte de temps à déterminer à quel constructeur revient la faute plutôt que de résoudre le problème, rallonge du down-time client

Votre problématique est résolue – le technicien tiers mainteneur est votre fournisseur de services et connaît votre solution personnalisée

ADMINISTRATION

La voie du constructeur est la seule voie

TPMs customize your data center support

Les contrats constructeurs tendent à vous enfermer dans un cercle restreint d'options pour le support de votre datacenter

Les TPM's offrent la flexibilité et une vaste typologie de service pour la maintenance de votre datacenter

Les constructeurs imposent au minimum une durée de contrat de 12 mois

Les TPM's proposent en général une durée minimum de contrat réduit à 1 mois

Liste des équipements dits « End of Service Life » (EOSL)

La liste que vous trouverez ci-après vous permettra une meilleure visibilité des équipements arrivés en fin de vie ainsi que de détecter les principales marques et gammes de produits qui ne sont plus couvertes ou qui ne le seront bientôt plus par le constructeur.

Si l'un de vos équipements se trouve sur cette liste vous devriez dès à présent envisager vos prochaines actions. Si vous disposez de matériel dans votre datacenter qui ne figure pas dans cette liste, n'hésitez pas à nous contacter. En effet nous maintenons également des équipements serveurs, stockages et réseaux qui ne sont pas encore End of Service Life.
